

# “Internationaler Künstlerverein e.V.” IKV

## Concept

It is our organization's objective to establish an international artistic and cultural network, opening a dialog for artistic and cultural exchange.

We have made it our goal to support and popularize contemporary art through projects, exhibits and workshops not only in Germany, but internationally.

Our cooperation with artists from different countries and different continents creates a basis for interchange and a platform for discussion, allowing a deeper understanding of the development of different arts and cultures.

As part of this cooperation, we support financially weak artists worthy of being sponsored.

We are aware that our participation in society has an impact and undertake the necessary process of education as part of our responsibility as a citizen of the world. Our organization is strictly non-profit – our artistic and cultural work is intended to create and support the foundation for a lasting opening in the behavior of the people.

The inclusion of the respective country's people is independent of age, gender, race and religion, and always corresponds to the specific project in question. We develop concepts for the individual projects shortly before they are implemented so we can refer to current themes and tenders.

Through accompanying activities (readings, lectures, performances et al.), the organization contributes to cultural education.
